# ABDULMALIK ALI AL-GHAMDI

**Information Technology Graduate | Software Systems & IT Specialist**

Riyadh, Saudi Arabia | +966 50 051 2410 | itbdalmlk@gmail.com

## PROFESSIONAL SUMMARY

Information Technology graduate targeting software systems and IT operations roles, with hands-on backend development experience in Node.js and JavaScript. Skilled in relational database design, system integration, and data modeling, with working knowledge of networking protocols, virtualization, and information security principles. Experienced in Agile delivery and technical project tracking, and known for analyzing operational workflows to deliver reliable digital solutions.

## TECHNICAL SKILLS

**JavaScript** | **Node.js** | **Database Management** | **SQL & Relational Databases** | **System Architecture** | **IT Infrastructure** | **TCP/IP Networking** | **Virtual Machines** | **Information Security** | **Cloud Fundamentals (AWS)** | **Log Analysis** | **Agile & Scrum** | **Project Planning (WBS)** | **Data Modeling (ERD)** | **RESTful APIs** | **MS Excel (Analytics)** | **SDLC** | **Systems Integration** | **Technical Documentation** | **VS Code**

## PRACTICAL EXPERIENCE & PROJECTS

### Tarbi Integrated Digital System Project

- Built a full-stack digital solution with Node.js and JavaScript to streamline user workflows and automate system processes.
- Engineered structured relational database schemas, ensuring data integrity, optimized queries, and reliable data flow.
- Mapped technical workflows through comprehensive systems analysis, translating functional requirements into high-efficiency software components.
- Implemented robust error handling, API connectivity, and log tracking to enhance backend reliability and system uptime.
- Tracked sprint milestones and module delivery using Agile methodologies and Work Breakdown Structures (WBS).

### Database Systems & IT Operations Lab

- Modeled complex Entity-Relationship Diagrams (ERDs) and executed structured SQL queries for enterprise data management.
- Configured virtual machine environments (VMs) to test system deployments and network configurations in isolated settings.
- Analyzed system event logs and processed operational data sets using advanced Excel techniques to produce actionable technical summaries and reporting dashboards.

## EDUCATION

**Bachelor of Information Technology | Al Baha University (2026)**

GPA: 3.17 / 4.00

## CERTIFICATIONS

**Technical Project Management & Agile Methodologies** - IBM

**Data Analysis & Information Processing Fundamentals** - IBM

## LANGUAGES

**Arabic** (Native) | **English** (Professional Working Proficiency)
